Annexure G-5

Construction airborne noise contours – Pyrmont Bridge Road
Annexure G-6

Construction airborne noise contours – St Peters
Annexure H

Construction CNVG additional mitigation locations
Additional mitigation areas provide indicative logical boundaries for the management of predicted residual impacts based on construction of the EIS design (highest noise activity). The anticipated duration of works is discussed in the noise and vibration technical paper.

The following abbreviations are used: Alternative Accommodation (AA), Respite Period 1 (R1), Verification (V), Phone calls (PC), Individual Briefings (IB), Specific notifications (SR), Notification (N), Respite Period 2 (R2), Negotiated Respite (NR), Highly Affected (HA), Respite Offer (RO).
