Ambient noise logger deployed at the eastern end of the Rozelle Rail Yard with view of City West Link and The Crescent.

Attended noise measurements indicate the ambient noise environment at this location is dominated by road traffic noise from City West Link and The Crescent. Vehicles frequently idle at the traffic lights at the intersection of City West Link and The Crescent. Aircraft noise is occasionally audible at this location.

Recorded Noise Levels: (L_{A_{max}}):
18/07/2016: Heavy vehicle traffic City West Link: 71-86 dBA, Light vehicle traffic City West Link: 68-76 dBA, Vehicles idling at traffic lights: 58-63 dBA, Vehicles turning from The Crescent: 60-72 dBA, Motorcycles on City West Link: 85-86 dBA, Aeroplanes: 65 dBA

| Logger Serial No: | 20673 |

Attended noise monitoring was conducted for a period of three hours beside the pedestrian footpath on Brenan St, Lilyfield, near Gladstone St.

Attended noise measurements indicate the ambient noise environment at this location is dominated by road traffic noise from City West Link to the north. Vehicle passby noise from Brenan St, aircraft noise and light rail noise contributed to the LAeq noise levels at this location.

Recorded Noise Levels: (L_{Amax}):
26/07/2016: Vehicle traffic Brenan St: 73-77 dBA, Heavy vehicle traffic City West Link: 55-69 dBA, Light vehicle traffic City West Link: 49-54 dBA, Buses on City West Link: 55 dBA, Motorcycles on City West Link: 71 dBA, Light rail vehicles: 64-68 dBA, Aeroplanes: 62-83 dBA

Noise Monitoring Location: R.12
Noise Monitoring Address: 104 Cecily St, Lilyfield

Logger Device Type: Svantek 957, Logger Serial No: 23243
Sound Level Meter Device Type: Brüel and Kjaer 2260, Sound Level Meter Serial No: 2414605

Ambient noise logger deployed in the front yard of residential address 104 Cecily St, Lilyfield.

Attended noise measurements indicate the ambient noise environment at this location is dominated by frequent aircraft noise and road traffic noise from Cecily St. It was identified that natural noise sources such as birds also contribute to the LAeq noise levels at this location. Distant road traffic noise was audible in the absence of other noise sources.

Noise Monitoring Location: R.13
Noise Monitoring Address: 50 Burt St, Rozelle

Logger Device Type: Svantek 957, Logger Serial No: 23244
Sound Level Meter Device Type: Brüel and Kjaer 2260, Sound Level Meter Serial No: 2414605

Ambient noise logger deployed in an elevated location above a wall in the rear yard of residential address 50 Burt St, Rozelle.

Attended noise measurements indicate the ambient noise environment at this location is dominated by frequent aircraft noise and road traffic noise from Alfred St to the north. It was identified that natural noise sources such as birds also contribute to the LAeq noise levels at this location.

Recorded Noise Levels: (LAmax):
14/09/2016: Light-vehicle traffic Alfred St: 55-58 dBA, Aircraft: 60-66 dBA, Birds: 50-73 dBA

R.15 Ambient Noise Monitoring Results

Statistical Ambient Noise Levels
R.15 - 55 Pritchard St, Annandale - Monday, 24 October 2016

Statistical Ambient Noise Levels
Attended noise monitoring was conducted for three one-hour periods beside the pedestrian footpath on Eglinton Rd, Glebe, near Bicentennial Park. The three one-hour periods correspond to the daytime, evening and night-time periods.

Attended noise measurements indicate the ambient noise environment at this location is dominated by road traffic noise from The Crescent, City West Link and Victoria Road to the northwest and north. Nearby vehicle passby noise from Eglinton Rd and aircraft noise also contribute to the LAeq noise levels at this location.

Recorded Noise Levels: (L\text{Amax}):
- Vehicle traffic Eglinton Rd: 73-77 dBA
- Heavy vehicle traffic The Crescent/City West Link/Victoria Rd: 55-62 dBA
- Light vehicle traffic The Crescent/City West Link/Victoria Rd: 48-54 dBA
- Buses on The Crescent/City West Link/Victoria Rd: 48-59 dBA
- Aeroplanes: 49-69 dBA

I.01 Ambient Noise Monitoring Results

Noise Monitoring Location: I.01

Noise Monitoring Address: 28 Warayama Pl, Rozelle

Logger Device Type: Svantek 977, Logger Serial No: 45705
Sound Level Meter Device Type: Brüel and Kjær 2260, Sound Level Meter Serial No: 2414605

Ambient noise logger deployed in an elevated position above the rear boundary wall at 28 Warayama Pl, Rozelle.

Attended noise measurements indicate the ambient noise environment at this location is dominated by road traffic noise from Victoria Rd. Discrete traffic noise level peaks from heavy-vehicle movements and car horns occur several times per minute.

Recorded Noise Levels: (LAmax):
26/09/2016: Light-vehicle traffic Victoria Rd: 72-78 dBA, Heavy-vehicle traffic Victoria Rd: 78-84 dBA, Aeroplanes: 77 dBA, Motorbikes on Victoria Rd: 78-88 dBA
