Infrastructure approval

Section 115ZB of the Environmental Planning & Assessment Act 1979

As delegate of the Minister for Planning under delegation executed on 16 February 2015, I grant approval to the carrying out of the State significant infrastructure (SSI) referred to in Schedule 1, subject to the conditions in Schedule 2.

David Gainsford
Executive Director
PRIORITY PROJECTS ASSESSMENT

Sydney 5th July 2017

SCHEDULE 1

Application no.: SSI 7734
Proponent: NSW Department of Industry – Lands & Forestry
Approval Authority: Minister for Planning
Land: Breakwater Wharf and dredging footprint partly within Lot 111 DP839683 and vacant Crown land at Snug Cove, Twofold Bay, within the Port of Eden.

Description of State Significant Infrastructure:
The proposed infrastructure includes:
- dredging of approximately 231,500m$^3$ of in-situ material from the bed of Snug Cove/Twofold Bay;
- extension of the existing Breakwater Wharf by approximately 95m;
- installation of three mooring dolphins and two berthing dolphins;
- installation of three mooring bollards on the existing wharf;
- extension of existing services (lighting, potable water and emergency fire-fighting water);
- installation of navigation aids; and
- operation of the extended wharf for use by cruise ships and associated land-based facilities and services for management of passenger visitation including disembarkation, embarkation and transport.

State Significant Infrastructure
The proposal is State Significant Infrastructure because it is development for the purpose of "port and wharf facilities or boating facilities (not including marinas) by or on behalf of a public authority that has a capital investment value (CIV) of more than $30 million" in accordance with Schedule 3 of State Environmental Planning Policy (State and Regional Development) 2011 (SRD SEPP).

### DEFINITIONS

**Table 1: Definitions**

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ancillary Facility</td>
<td>Temporary facility required for Construction of the project including an office and amenities compound, construction compound, material crushing and screening plant, materials storage compound, maintenance workshop, testing laboratory and material stockpile area</td>
</tr>
<tr>
<td>CEMP</td>
<td>Construction Environmental Management Plan</td>
</tr>
<tr>
<td>Completion of construction</td>
<td>The date upon which all construction works and activities described in the EIS/Submissions Report are completed, all requirements of the Secretary (if any) have been met and the whole of the SSI has been constructed to the appropriate standard for operation</td>
</tr>
<tr>
<td>Consistency assessment</td>
<td>An assessment of whether a proposed activity for the purpose of the SSI is consistent with the terms of this approval</td>
</tr>
<tr>
<td>Construction</td>
<td>Includes all physical work required to construct the SSI, other than the following low impact work:</td>
</tr>
<tr>
<td></td>
<td>(a) survey works including carrying out general alignment survey, installing survey controls (including installation of global positioning system (GPS)), installing repeater stations, carrying out survey of existing and future utilities and building and road dilapidation surveys, and hydrographic survey;</td>
</tr>
<tr>
<td></td>
<td>(b) background and/or baseline monitoring works;</td>
</tr>
<tr>
<td></td>
<td>(c) investigations including investigative drilling and excavation;</td>
</tr>
<tr>
<td></td>
<td>(d) establishment of ancillary facilities in approved locations or in locations meeting the criteria identified in Condition A9 and Condition A11 of this approval including constructing ancillary facility access roads and providing utilities to the facility;</td>
</tr>
<tr>
<td></td>
<td>(e) operation of ancillary facilities if the ER has determined the operational activities will have minimal impact on the environment and community;</td>
</tr>
<tr>
<td></td>
<td>(f) minor clearing and relocation of native vegetation, as identified in the EIS/Submissions Report;</td>
</tr>
<tr>
<td></td>
<td>(g) installation of mitigation measures including erosion and sediment controls, temporary exclusion fencing for sensitive areas and acoustic treatments;</td>
</tr>
<tr>
<td></td>
<td>(h) relocation and connection of utilities where the relocation or connection does not present a significant risk to the environment as determined by the ER;</td>
</tr>
<tr>
<td></td>
<td>(i) archaeological testing under the Code of practice for archaeological investigation of Aboriginal objects in NSW (DECCW, 2010) or archaeological monitoring undertaken in association with [a]-[i] above to ensure that there is no impact on heritage items</td>
</tr>

SCHEDULE 2
PART A
ADMINISTRATIVE CONDITIONS

GENERAL
A1 The SSI must be carried out generally in accordance with the description of the SSI in the EIS as amended by the Submissions Report, and the Proposed Mitigation Measures, and in accordance with the terms of this approval.

A2 The SSI must be carried out generally in accordance with all procedures, commitments, preventative actions, performance criteria and mitigation measures set out in the EIS and Submissions Report unless otherwise specified in, or required under, this approval.

A3 The SSI must be carried out in accordance with the terms and conditions of all other approvals, permits and licences.

A4 In the event of an inconsistency between the EIS and Submissions Report or any other document required under this approval (including the Proposed Mitigation Measures), and a term of this approval, the term of this approval prevails to the extent of the inconsistency. For the purpose of this condition, there will be an inconsistency between a term of this approval and any document if it is not possible to comply with both the term and the document.

A5 The Proponent must comply with all requirements of the Secretary in relation to:
(a) the environmental performance of the SSI;
(b) any document or correspondence;
(c) any notification given to the Secretary under the terms of this approval;
(d) any audit of the Construction or Operation of the SSI;
(e) compliance with the terms of this approval (including anything required to be done under this approval); and
(f) the carrying out of any additional monitoring or mitigation measures.

A6 Without limitation, all strategies, plans, programs, reviews, audits, report recommendations, protocols and other documents must be implemented in accordance with all requirements issued by the Secretary from time to time in respect of them.

A7 Where the terms of this approval require consultation with identified parties, details of the consultation undertaken, matters raised by the parties, and how the matters were considered must accompany the strategies, plans, programs, reviews, audits, protocols and the like submitted to the Secretary.

A8 This approval lapses five years after the date on which it is granted, unless Construction of the SSI has commenced on or before that date.

ANCILLARY FACILITIES
A9 Ancillary Facilities that are not identified by description and location in the EIS/Submissions Report must not be established unless they satisfy the following criteria:

(a) the Ancillary Facility is development of a type that would, if it were not for the purpose of the SSI, otherwise be exempt or complying development; or
(b) the Ancillary Facility is located as follows:
   i. at least 50 metres from any waterway unless an erosion and sediment control plan is prepared and implemented so as not to affect water quality in the waterway in accordance with Managing Urban Stormwater: Soils and Construction (4th ed)_(Landcom, 2004);
ii. within or adjacent to land upon which the SSI is being carried out;
iii. with ready access to a road network;
iv. on level land;
v. so as to be in accordance with the *Interim Construction Noise Guideline* (DECC 2009) or as otherwise agreed in writing with affected landowners and occupiers;
vi. so as not to require vegetation clearing beyond the extent of clearing approved under other terms of this approval except as approved by the ER as minor clearing;
vii. so as not to have any impact on heritage items (including areas of archaeological sensitivity)
viii. so as not to affect lawful uses of adjacent properties that are being carried out at the date upon which establishment of the Ancillary Facility is to commence;
ix. to enable use of the Ancillary Facility during flood/oceanic inundation events and to avoid or minimise, to the greatest extent practicable, adverse flood impacts on the surrounding environment and other properties and infrastructure; and
x. so as to have sufficient area for the storage of materials to minimise, to the greatest extent practicable, the number of deliveries required outside standard construction hours.

A10 Prior to establishment of any Ancillary Facility that satisfies the criteria in *Condition A9*, the Proponent must update the CEMP required under *Condition C1* to include the ancillary facility and any additional environmental management measures.

A11 Minor Ancillary Facilities comprising lunch sheds, office sheds, and portable toilet facilities, that are not identified in the EIS/Submissions Report and which do not satisfy the criteria set out in *Condition A9* of this approval must satisfy the following criteria in order to be established:

(a) have no greater environmental and amenity impacts than those that can be managed through the implementation of environmental measures detailed in the CEMP required under *Condition C1* of this approval; and
(b) have been assessed by the ER to have:
   i. minimal amenity impacts to surrounding residences and businesses, after consideration of matters such as compliance with the *Interim Construction Noise Guideline* (DECC 2009), traffic and access impacts, dust and odour impacts, and visual (including light spill) impacts;
   ii. minimal environmental impact with respect to waste management and flooding; and
   iii. no impacts on biodiversity, soil and water, and heritage items beyond those already approved under other terms of this approval.

A12 Boundary screening must be erected around all Ancillary Facilities (including Minor Ancillary Facilities) that are adjacent to Sensitive Receivers for the duration of Construction unless otherwise agreed with Council, and affected residents, business operators or landowners.

A13 Boundary screening required under *Condition A12* of this approval must minimise visual, noise and air quality impacts on adjacent Sensitive Receivers.

**ENVIRONMENT REPRESENTATIVE**

A14 A suitably qualified and experienced ER who is independent of the construction personnel must be nominated by the Proponent, approved by the Secretary and engaged for the duration of Construction of the SSI. Additional ERs may be engaged for the purpose of this condition, in which case the obligations to be carried out by an ER under the terms of this approval may be satisfied by any ER that is approved by the Secretary. The details of nominated ER(s) must be submitted to the Secretary for approval no later than one month prior to the commencement of Construction, or within another timeframe agreed with the Secretary.

A15 Works must not commence until an ER nominated under *Condition A14* of this approval has been approved by the Secretary.
A16 From commencement of Construction until Completion of Construction, the approved ER must:
(a) on behalf of the Proponent, receive and respond to communication from the Secretary in relation to the environmental performance of the SSI;
(b) consider and inform the Secretary on matters specified in the terms of this approval;
(c) consider and recommend any improvements that may be made to work practices to avoid or minimise adverse impact to the environment and to the community;
(d) review all documents required to be prepared under the terms of this approval, ensure they are consistent with requirements in or under this approval and if so, endorse them prior to submission to the Secretary (if required to be submitted to the Secretary) or prior to implementation (if not required to be submitted to the Secretary);
(e) regularly monitor the implementation of all documents required to be prepared under the terms of this approval to ensure implementation is being carried out in accordance with what is stated in the document and the terms of this approval;
(f) notify the Secretary of an incident in accordance with Condition A33 of this approval;
(g) as may be requested by the Secretary, help plan, attend or undertake Department audits of the SSI including scoping audits, programming audits, briefings, and site visits, but not audits required under Condition A24 of this approval;
(h) if conflict arises between the Proponent's construction contractor(s) and the community in relation to the environmental performance of the SSI, follow the procedure in the Community Communication Strategy approved under Condition B4 of this approval to attempt to resolve the conflict, and if it cannot be resolved, notify the Secretary;
(i) review any draft consistency assessment that may be carried out by the Proponent, provide advice to the Proponent on whether the work that is the subject of the draft consistency assessment is consistent with the terms of this approval and provide advice on any additional mitigation measures required to minimise the impact of the work;
(j) consider any minor amendments to be made to the CEMP, CEMP Sub-plans and monitoring programs that comprise updating or are of an administrative nature, and are consistent with the terms of this approval and the CEMP, CEMP Sub-plans and Monitoring Programs approved by the Secretary and, if satisfied such amendment is necessary, approve the amendment. This does not include any modifications to the terms of this approval;
(k) assess the impacts of Minor Ancillary Facilities as required by Condition A11 of this approval; and
(l) prepare and submit to the Secretary and other relevant regulatory agencies, for information, a monthly Environmental Representative Report detailing the ER's actions and decisions on matters for which the ER was responsible in the preceding month (or other timeframe agreed with the Secretary). The Environmental Representative Report must be submitted within seven days following the end of each month for the duration of Construction of the SSI, or as otherwise agreed with the Secretary.

COMPLIANCE TRACKING PROGRAM

A17 Construction and Operation Compliance Tracking Programs to monitor compliance with the terms of this approval must be prepared. The Construction Compliance Tracking Program must be endorsed by the ER and then submitted to the Secretary for approval no later than one month prior to the commencement of Construction or within another timeframe agreed with the Secretary. The Operation Compliance Tracking Program must be submitted to the Secretary for approval no later than one month prior to commencement of Operation or within another timeframe agreed with the Secretary.

A18 The Construction and Operation Compliance Tracking Programs must be implemented for the duration of Construction and Operation, or within another timeframe agreed with the Secretary based on the outcomes of independent audits, Environmental Representative Reports and regular compliance reviews submitted through Compliance Reports.

A19 A Pre-Construction Compliance Report and Pre-Operation Compliance Report must be prepared and submitted to the Secretary for information no later than one month prior to the
commencement of Construction and Operation respectively or within another timeframe agreed with the Secretary.

A20 Construction and Operation must not commence until the Pre-Construction Compliance Report and Pre-Operation Compliance Report respectively have been submitted to the Secretary.

A21 Construction and Operation Compliance Reports must be prepared and submitted to the Secretary for information every six months from the date of the commencement of Construction and Operation, respectively, or within another timeframe agreed with the Secretary.

COMPLIANCE REPORTS

A22 The Pre-Construction and Pre-Operation Compliance Reports must include:

(a) details of how the terms of this approval that must be addressed prior to the commencement of Construction and Operation respectively have been complied with;
(b) in the event of a non-compliance with the terms of this approval that must be addressed prior to the commencement of Construction and Operation respectively, details of the non-compliance and action taken to rectify the non-compliance; and
(c) the commencement date for Construction and Operation respectively.

A23 Construction and Operation Compliance Reports must include:

(a) a results summary and analysis of environmental monitoring;
(b) a summary of the Complaints Register required under Condition A28 including the number of any complaints received, a summary of main areas of complaint, action taken, response given and proposed strategies for reducing the recurrence of such complaints;
(c) details of any review of, and minor amendments made to, the CEMP or OEMP;
(d) a register of any consistency assessments undertaken and their status;
(e) results of any independent environmental audits and details of any actions taken in response to the recommendations of an audit;
(f) a summary of all incidents notified in accordance with Condition A33 and Condition A34 of this approval including actions taken to address the cause or impact of an incident; and
(g) any other matter relating to compliance with the terms of this approval or as requested by the Secretary.

COMPLIANCE AUDITING

A24 Compliance audits of the SSI must be conducted annually, commencing within a year of the commencement of Construction, by an independent, suitably qualified and experienced expert or within another timeframe agreed with the Secretary.

A25 Details of the nominated independent auditor must be submitted to the Secretary for approval no later than one month prior to the audit being undertaken.

A26 The Proponent must submit a copy of the audit report to the Secretary with a response to any recommendations contained in the audit report within six weeks of completing the audit, or within another timeframe agreed with the Secretary.

A27 The audit report must:

(a) assess the environmental performance of the SSI, and its effects on the surrounding environment;
(b) assess whether the project is complying with the terms of this approval;
(c) review the adequacy of any document required under this approval; and
(d) recommend measures or actions to improve the environmental performance of the SSI, and improvements to any document required under this approval.

**COMPLAINTS REGISTER**

A28 A **Complaints Register** must be maintained for the duration of Construction and Operation.

A29 The **Complaints Register** must be provided to the Secretary upon request, within the timeframe stated in the request.

A30 The following information must be available to facilitate community enquiries and complaints within one (1) month from the date of this approval:

(a) a 24 hour telephone number for the registration of complaints and enquiries about the SSI;
(b) a postal address to which written complaints and enquiries may be sent;
(c) an email address to which electronic complaints and enquiries may be transmitted; and
(d) a mediation system for complaints unable to be resolved.
This information must be accessible to all in the community regardless of age, ethnicity, disability or literacy level.

A31 The telephone number, postal address and email address required under **Condition A30** of this approval must be published in a newspaper circulating in the local area prior to the commencement of Construction and published in the same way again prior to the commencement of Operation. This information must also be provided on the website required under **Condition B6** of this approval.

A32 The **Complaints Register** must record the:
(a) number of complaints received;
(b) number of people affected in relation to a complaint;
(c) means by which the complaint was addressed and whether resolution was reached, with or without mediation.

**INCIDENT NOTIFICATION**

A33 The Secretary must be notified as soon as possible and in any event within 24 hours of the Proponent being made aware of any incident.

A34 Notification of an incident under **Condition A33** of this approval must include the time and date of the incident, details of the incident and must identify any non-compliance with this approval.

A35 Any requirements of the Secretary or relevant public authority (as determined by the Secretary) to address the cause or impact of an incident reported in accordance with **Condition A33** of this approval, must be met within the timeframe determined by the Secretary or relevant public authority.

A36 If statutory notification is given to the EPA as required under the POEO Act in relation to the SSI, such notification must also be provided to the Secretary within 24 hours after the notification was given to the EPA.

**STAGING**

A37 The SSI may be constructed and operated in stages. Where staged construction or operation is proposed, a **Staging Report** (for either or both construction and operation as the case requires) must be prepared and submitted to the Secretary for information. The **Staging Report** must be submitted to the Secretary no later than one month before the commencement of construction of the first of the proposed stages of construction (or if only staged operation is proposed, one
month before the commencement of operation of the first of the proposed stages of operation), or within another timeframe agreed with the Secretary.

A38 The **Staging Report** must:

(a) if staged construction is proposed, set out how the construction of the whole of the SSI will be staged, including general details of work and other activities to be carried out in each stage and the general timing of when construction of each stage will commence;

(b) if staged operation is proposed, set out how the operation of the whole of the SSI will be staged, including general details of work and other activities to be carried out in each stage and the general timing of when operation of each stage will commence;

(c) specify the relevant conditions of approval that apply to each stage and how compliance with those conditions will be achieved across and between each of the stages of the SSI, and

(d) set out mechanisms for managing any cumulative impacts arising from the proposed staging.

A39 The SSI must be staged in accordance with the **Staging Report**, as submitted to the Secretary.

A40 Where staging is proposed, the terms of this approval that apply or are relevant to the works or activities to be carried out in a specific stage must be complied with at the relevant time for that stage.
PART B
COMMUNITY INFORMATION AND REPORTING

COMMUNITY INFORMATION, CONSULTATION AND INVOLVEMENT

B1 Prior to commencement of Construction, the Proponent is required to establish a Community Consultative Committee.

The Community Consultative Committee is to be established in accordance with the Department's Community Consultative Committee Guidelines for State Significant Projects, dated November 2016, or from an existing group that can be demonstrated to meet the purposes and objectives of the Guidelines as agreed by the Secretary.

The committee is to include representatives from port businesses, maritime user groups, residents surrounding the Port of Eden and the Relevant Maritime Authority and is to operate during Construction and during Operation of the SSI for a period as agreed with the Secretary, but not for less than five years from commencement of operation of the committee.

B2 A Report endorsed by the Community Consultative Committee is to be submitted to the Secretary five years after commencement of operation of the Committee, reporting on whether the purpose of the Committee has been achieved and completed, and recommending a timeframe for continued operation. Where disbandment of the committee is recommended, minutes of the committee meeting documenting member agreement to disbandment are to be provided in the Report for consideration by the Secretary.

B3 A Community Communication Strategy must be prepared to provide mechanisms to facilitate communication between the Proponent, the ER, the relevant Council, the Community Consultative Committee and others directly impacted by the SSI, during Construction of the SSI and for a minimum of 12 months following the completion of Construction of the SSI.

B4 The Community Communication Strategy must be submitted to the Secretary for approval no later than one month prior to commencement of any work (excluding works described in paragraphs (a) to (c) in the definition of Construction) for the purposes of the SSI, or within another timeframe agreed with the Secretary. Work for the purposes of the SSI (excluding works described in paragraphs (a) to (c) in the definition of Construction) must not commence until the Community Communication Strategy has been approved by the Secretary.

B5 The Community Communication Strategy must:

(a) identify people to be consulted during Construction;
(b) set out procedures and mechanisms for the regular distribution of accessible information about or relevant to the SSI;
(c) provide for the formation of community-based forums, if required, that focus on key environmental management issues for the SSI;
(d) set out procedures and mechanisms:
   i. through which the community can discuss or provide feedback to the Proponent;
   ii. through which the Proponent will respond to enquiries or feedback from the community; and
   iii. to resolve any issues and mediate any disputes that may arise in relation to environmental management and delivery of the SSI.

PROVISION OF ELECTRONIC INFORMATION

B6 A website providing information in relation to the SSI must be established prior to commencement of Construction and maintained for the duration of Construction and Operation. Up-to-date information (excluding confidential commercial information) must be published and maintained on the website or dedicated pages including:

NSW Government
Department of Planning and Environment
(a) information on the current implementation status of the SSI;
(b) a copy of the documents listed in Condition A1 and Condition A2 of this approval, and any
documentation relating to any modifications made to the SSI or the terms of this approval;
(c) a copy of this approval in its original form, a current consolidated copy of this approval (that
is, including any approved modifications to its terms), and copies of any approval granted by
the Minister to a modification of the terms of this approval;
(d) a copy of each statutory approval, licence or permit required and obtained in relation to the
SSI including Commonwealth permits or approvals;
(e) a current copy of each document required under the terms of this approval and any
endorsements, approvals or requirements from the ER and Secretary, all of which must be
published prior to the commencement of any works to which they relate or prior to their
implementation as the case may be; and
(f) the outcomes of compliance tracking required under this approval.

Information relating solely to construction may be removed from the website 12 months following
completion of construction.
PART C
CONSTRUCTION ENVIRONMENTAL MANAGEMENT

CONSTRUCTION ENVIRONMENTAL MANAGEMENT PLAN

C1 A Construction Environmental Management Plan (CEMP) must be prepared to detail how the performance outcomes, commitments and mitigation measures specified in the EIS and Submissions Report will be implemented and achieved during Construction.

C2 The CEMP must provide:
(a) a description of activities to be undertaken during Construction (including the scheduling of Construction). Where the CEMP covers construction to be carried out under other approvals, licences and permits, the CEMP must clearly identify which activities are to be carried out under this approval;
(b) details of environmental policies, guidelines and principles to be followed in the Construction of the SSI;
(c) a program for ongoing analysis of the key environmental risks arising from the activities described in subsection (a) of this condition, including an initial risk assessment undertaken prior to the commencement of Construction of the SSI;
(d) a list of all the CEMP Sub-plans required in respect of construction, as set out in Condition C3;
(e) details of how the activities described in subsection (a) of this condition will be carried out under the CEMP and Sub-plans to:
   i. achieve the environmental performance outcomes identified in the EIS/Submissions Report,
   ii. implement the mitigation measures identified in the EIS/Submissions Report,
   iii. comply with the relevant terms of this approval, and
   iv. manage issues during construction, as identified through the ongoing environmental risk analysis referred to in subsection (c) of this condition;
(f) an inspection program detailing the activities to be inspected and frequency of inspections;
(g) a description of the roles and environmental responsibilities for relevant employees and their relationship with the ER including for management of any matters which are to be reported in the Construction Compliance Reports required under Condition A21.
(h) for training and induction for employees, including contractors and sub-contractors, in relation to environmental and compliance obligations under the terms of this approval;
(i) a description of the categories of minor amendments that may be considered by the Environmental Representative under condition A16(j); and
(j) for periodic review and update of the CEMP and all associated plans and programs.

C3 The following CEMP Sub-plans must be prepared in consultation with the relevant government agencies and stakeholders identified for each CEMP Sub-plan, and in consideration of the relevant requirements in this approval and the Proposed Mitigation Measures:

<table>
<thead>
<tr>
<th>Required CEMP Sub-plan</th>
<th>Relevant government agencies and stakeholders to be consulted</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a) Traffic, Access and Transport</td>
<td>Council, Community Consultative Committee required under condition B1</td>
</tr>
<tr>
<td>(b) Noise and Vibration</td>
<td>Council, EPA, Community Consultative Committee required under condition B1</td>
</tr>
<tr>
<td>(c) Aquatic Ecology</td>
<td>DPI, OEH</td>
</tr>
<tr>
<td>(d) Water Quality</td>
<td>Council, EPA, DPI</td>
</tr>
</tbody>
</table>

C4 The CEMP Sub-plans must include, to the written satisfaction of the Secretary, details of all information requested by an agency to be included in a CEMP Sub-plan, including copies of all correspondence from those agencies.

C6 Any of the CEMP Sub-plans may be submitted along with, or subsequent to, the submission of the CEMP but in any event, no later than one month prior to construction.

C7 The CEMP must be endorsed by the ER and then submitted to the Secretary for approval no later than one month prior to the commencement of construction or within another timeframe agreed with the Secretary.

C8 Any future amendments to the CEMP or CEMP Sub-plans are to submitted to the Secretary for approval, other than amendments that can be approved by the ER under Condition A16(j).

C9 Construction must not commence until the CEMP and all CEMP Sub-plans have been approved by the Secretary. The CEMP and CEMP Sub-plans, as approved by the Secretary, including any minor amendments approved by the ER in accordance with Condition A16, must be implemented for the duration of construction.

CONSTRUCTION MONITORING PROGRAMS

C10 The following Construction Monitoring Programs must be prepared in consultation with the relevant government agencies identified for each Construction Monitoring Program to compare actual performance of construction of the SSI against performance predicted in the EIS/Submissions Report or in the CEMP:

<table>
<thead>
<tr>
<th>Required Construction Monitoring Programs</th>
<th>Relevant government agencies to be consulted</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a) Noise Monitoring triggered by Condition E11</td>
<td>Council, EPA</td>
</tr>
<tr>
<td>(b) Marine Ecology Monitoring</td>
<td>DPI, OEH</td>
</tr>
<tr>
<td>(c) Water Quality (Turbidity) Monitoring</td>
<td>DPI, EPA</td>
</tr>
</tbody>
</table>

C11 Each Construction Monitoring Program must provide:

(a) details of baseline data available;
(b) details of baseline data to be obtained and when;
(c) details of all monitoring of the project to be undertaken;
(d) the parameters of the project to be monitored;
(e) the frequency of monitoring to be undertaken;
(f) the location of monitoring;
(g) the reporting of monitoring results;
(h) procedures to identify and implement additional mitigation measures where results of monitoring are unsatisfactory; and
(i) any consultation to be undertaken in relation to the monitoring programs.

C12 The Construction Monitoring Programs must include, to the written satisfaction of the Secretary, information requested by an agency to be included in a Construction Monitoring Program including copies of all correspondence from those agencies.

C13 The Construction Monitoring Programs must be endorsed by the ER and then submitted to the Secretary for approval at least one month prior to the commencement of Construction or within another timeframe agreed with the Secretary.
C14 Construction must not commence until the Secretary has approved the required Construction Monitoring Programs, and all relevant baseline data for the specific construction activity has been collected.

C15 The Construction Monitoring Programs, as approved by the Secretary including any minor amendments approved by the ER in accordance with Condition A16 must be implemented for the duration of Construction and for any longer period set out in the monitoring program or specified by the Secretary, whichever is the greater.

C16 The results of the Construction Monitoring Programs must be submitted to the Secretary, and relevant regulatory agencies, for information in the form of a Construction Monitoring Report at the frequency identified in the relevant Construction Monitoring Program.

C17 Where a relevant CEMP Sub-plan exists, the relevant Construction Monitoring Program may be incorporated into that CEMP Sub-plan.
PART D
OPERATIONAL ENVIRONMENTAL MANAGEMENT

OPERATIONAL ENVIRONMENTAL MANAGEMENT

D1 An Operational Management Plan (OEMP) must be prepared to detail how the performance outcomes, commitments and mitigation measures made and identified in the EIS and Submissions Report will be implemented and achieved during Operation.

D2 The OEMP must provide:

(a) a description of management and monitoring activities. Where the OEMP covers activities to be carried out under other approvals, licences and permits, the OEMP must clearly identify which activities are to be carried out under this approval;
(b) details of environmental policies, guidelines and principles to be followed in the operation of the SSI;
(c) a list of all the OEMP Sub-plans required in respect of Operation, as set out in Condition D3.
(d) details of how the Operation of the SSI will be carried out under the OEMP and OEMP Sub-plans:
   i. achieve the environmental performance outcomes identified in the EIS/Submissions Report;
   ii. implement the mitigation measures identified in the EIS/Submissions Report;
   iii. comply with the relevant terms of this approval; and
   iv. address issues during Operation, as identified through the Community Consultative Committee, Complaints Register or Monitoring Programs, through a process of continual improvement.
(e) an inspection program detailing the activities to be inspected and frequency of inspections.
(f) a description of the roles and environmental responsibilities of the Proponent’s employees and their relationship with the Relevant Maritime Authority and Council including roles and responsibilities for management of any matters which are to be reported in the Operation Compliance Reports required under Condition A21.
(g) for training and induction for employees, including contractors and sub-contractors, in relation to environmental and compliance obligations under the terms of this approval;
(h) for periodic review and update of the OEMP and all associated plans and programs.

D3 The following OEMP Sub-plans must be prepared in consultation with the relevant government agencies identified for each OEMP Sub-plan, and in consideration of the relevant requirements in this approval and the Proposed Mitigation Measures:

<table>
<thead>
<tr>
<th>Required OEMP Sub-plan</th>
<th>Relevant government agencies to be consulted</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a) Traffic, Transport and Access</td>
<td>Council, Relevant Maritime Authority</td>
</tr>
<tr>
<td>(b) Noise Management</td>
<td>Council, EPA, Relevant Maritime Authority</td>
</tr>
<tr>
<td>(c) Air Quality Management</td>
<td>EPA, Relevant Maritime Authority</td>
</tr>
</tbody>
</table>

D4 The OEMP Sub-plans must include, to the written satisfaction of the Secretary, information requested by an agency to be included in an OEMP Sub-plan, including copies of all correspondence from those agencies.

D5 The OEMP and OEMP Sub-plans must be submitted to the Secretary for approval no later than one month prior to the commencement of Operation unless another timeframe is agreed with the Secretary.

D6 The OEMP, as approved by the Secretary and amended from time to time, must be implemented for the duration of Operation and the OEMP must be made publicly available prior to the commencement of Operation and for the duration of Operation.
OPERATION MONITORING PROGRAM

D7 An Air Quality Operation Monitoring Program must be prepared in consultation with the EPA, Council and Relevant Maritime Authority.

D8 The Air Quality Operation Monitoring Program must provide:

(a) details of baseline data available;
(b) details of baseline data to be obtained and when;
(c) details of all monitoring of the project to be undertaken;
(d) the parameters of the project to be monitored;
(e) the frequency of monitoring to be undertaken;
(f) the trigger for operational monitoring
(g) the location of monitoring;
(h) the reporting of monitoring results;
(i) procedures to identify and implement additional mitigation measures where results of monitoring are unsatisfactory; and
(j) any consultation to be undertaken in relation to the monitoring programs.

D9 The Air Quality Operation Monitoring Program must include, to the written satisfaction of the Secretary, information requested by an agency to be included in the Operation Monitoring Program including copies of all correspondence from those agencies.

D10 The Air Quality Operation Monitoring Program must be submitted to the Secretary for approval at least one month prior to the commencement of Operation or within another timeframe agreed with the Secretary.

D11 Operation must not commence until the Secretary has approved the required Air Quality Operation Monitoring Program, and all relevant baseline data has been collected.

D12 The Air Quality Operation Monitoring Program, as approved by the Secretary, and amended from time must be implemented for the period set out in the monitoring program or specified by the Secretary, whichever is the greater.

D13 The results of the Air Quality Operation Monitoring Program must be submitted to the Secretary, and relevant regulatory agencies, for information in the form of an Operation Monitoring Report at the frequency identified in the relevant Operation Monitoring Program.

D14 Where a relevant OEMP Sub-plan exists, the relevant Air Quality Operation Monitoring Program may be incorporated into that OEMP Sub-plan.
PART E
KEY ISSUE CONDITIONS

TERMS OF APPROVAL

E1 No cruise ship is permitted to berth before 7.00am or after 10pm unless extenuating circumstances prevail such as mechanical failure, an on-board emergency or severe weather conditions.

E2 In addition to the performance outcomes, commitments and mitigation measures specified in the EIS and Submissions Report, all reasonably practicable measures must be implemented to minimise noise impacts and the emission of air pollutants during Operation of the SSI.

DILAPIDATION REPORT

E3 A Road Dilapidation Report must be prepared for all roads within the control of Council proposed to be used by heavy vehicles prior to the commencement of use by such vehicles. Copies of the Road Dilapidation Report must be provided to Council within three weeks of completing the surveys and no later than one week prior to the commencement of Construction of the SSI.

E4 On Completion of Construction, a Road Dilapidation Report must be prepared for all roads within the control of Council that were used by heavy vehicles during Construction. Copies of the Road Dilapidation Report must be provided to Council within three weeks of completing the surveys. If damage to roads occurs as a result of Construction of the SSI, the Proponent must either (at Council’s discretion):
(a) agree with Council the amount of compensation to be paid to Council for the damage so caused; or
(b) rectify the damage so as to restore the road to at least the condition it was pre-construction.

TRAFFIC, TRANSPORT AND ACCESS

E5 The SSI must be constructed so that it does not adversely impact on the safety and efficiency of the transport system (road and maritime) in the vicinity of the SSI or businesses within the Port of Eden.

E6 The Traffic, Transport and Access CEMP Sub-plan must include the following:
(a) identify roads to be utilised as part of Construction and measures to ensure construction vehicles follow this route;
(b) identify marine construction and vessel mooring zones and measures to delineate these areas;
(c) measures to maintain access to the Multipurpose Jetty or other arrangements for vessels utilising this jetty;
(d) measures for safe passenger access, if cruise ships moor in Twofold Bay and tenders to and from the Port of Eden operated during Construction;
(e) measures to minimise disruptions to Port businesses including maintenance of pedestrian and vehicle access and parking and provision of directional signage.
(f) measures to physically separate pedestrian and construction vehicle movements, such as temporary barriers.

E7 The Traffic, Transport and Access OEMP Sub-plan must include detail on the provision of infrastructure, facilities and services to cater for cruise ship passengers and ensure safe access including:
(a) pedestrian access to Eden Town Centre and Port of Eden retail areas;
(b) pedestrian access to tourist facilities and other local businesses;
(c) passenger transport services for visits to local and regional businesses and attractions;
(d) bus parking bays, waiting areas, shelters, signage and the like at the wharf and at pick up points in the local area; and
(e) provision of personnel to oversee pedestrian movements on the wharf and surrounding areas during cruise ship visits.

NOISE AND VIBRATION

E8 The SSI is to be constructed and operated to minimise noise impacts on surrounding residents.

E9 Construction (except for dredging and offshore disposal activities) must only be undertaken during the following standard construction hours:
(a) 7:00am to 6:00pm Mondays to Fridays, inclusive;
(b) 8:00am to 1:00pm Saturdays; and
(c) at no time on Sundays or public holidays.

except in the following circumstances:

i. for the delivery of materials required by the NSW Police Force or other authority for safety reasons;
ii. where it is required in an emergency to avoid injury or the loss of life, to avoid damage or loss of property or to prevent environmental harm; and
iii. where different construction hours are permitted or required under an EPL in force in respect of the Construction, in which case those construction hours must be complied with.

E10 Respite periods must be provided where noise exceeds the Highly Noise Affected Level of 75dB L_{Aeq,15} minute. The timing of respite is to be determined in consultation with the Community Consultative Committee.

E11 Notwithstanding condition E9, offshore disposal activities may be undertaken 24 hours a day, seven days a week, provided they are undertaken in accordance with a Noise and Vibration CEMP Sub-Plan and the terms of this approval.

E12 Notwithstanding condition E9, dredging activities may be undertaken 24 hours a day, seven days a week, provided dredging activities between 10pm and 7am are undertaken in accordance with a Night Dredging Protocol detailing the assessment and management of noise, and the requirements of Conditions E13 to E16.

E13 The Night Dredging Protocol must provide for:
(a) noise monitoring at a representative number of sensitive receivers (including closest and furthest) to confirm the predicted noise levels;
(b) targeted consultation with the noise affected sensitive receivers;
(c) timeframes and methods for investigation of noise complaints;
(d) operation of a 24-hour complaints line;
(e) mitigation measures (such as respite periods, additional control of noise at the source, staging of works to locate noisy equipment further away from noise affected sensitive receivers, negotiated agreements etc.);
(f) submission of weekly complaints reports for the life of dredging activities between 10pm and 7am;
(g) continual refinement of mitigation measures based on consultation with the noise affected sensitive receivers; and
(h) implementation of work practices set out in section 5.2 of the Interim Construction Noise Guideline.

E14 The Night Dredging Protocol must provide for a three-week assessment period, during the first three weeks of dredging activities between 10pm and 7am. The purpose of the three-week assessment period is to evaluate night time noise impacts from dredging, determine noise levels when the dredge is operating at different distances from sensitive receivers, and to demonstrate that night time dredging complies with the predicted noise levels.
The assessment period must include:
(a) implementation of the monitoring and mitigation measures set out in the Noise and Vibration CEMP Sub-Plan (including the Night Dredging Protocol);
(b) weekly reporting to the Secretary of:
   i. the number, nature and time of all complaints relating to dredging activities between 10pm and 7am,
   ii. actions taken to address complaints with the objective of resolution, and
   iii. in the event that additional noise impacts are identified, how the Proponent has developed additional management and mitigation measures, evaluated their likely effectiveness in reducing noise impacts, and implemented any additional measures; and
(c) a Night Dredging Assessment Period Report, submitted for the approval of the Secretary within one week of the end of the assessment period, providing:
   i. an analysis of the effectiveness of the monitoring and mitigation measures set out in the Noise and Vibration CEMP Sub-Plan (including the Night Dredging Protocol);
   ii. how mitigation measures have been refined during the assessment period, and/or will be refined following the assessment period; and
   iii. how complaints have been resolved, mediated or otherwise addressed.

E15 The mitigation and management measures developed under conditions E13 and E14 are to be detailed in an updated Night Dredging Protocol, submitted for the approval of the Secretary within one week of her determination of the Night Dredging Assessment Period Report.

The updated Night Dredging Protocol as approved by the Secretary must be incorporated into the Noise and Vibration CEMP Sub-plan.

E16 The Proponent will comply with all requirements of the Secretary arising from the review of the weekly complaints reports required under condition E13 and Night Dredging Assessment Period Report.

E17 The Noise Management OEMP Sub-plan must identify measures to reduce noise impacts on Sensitive Receivers including:
   (a) no deck announcements and music from open decks while in the Port of Eden or transit, with the exception of safety announcements;
   (b) ship generators/engines/exhausts must be maintained, upgraded and operated efficiently to reduce noise emissions while in the Port of Eden;
   (c) ships must run on the minimum generator/engine power required while at the berth;
   (d) in the event of an overnight berth due to extenuating circumstances, community information and notification; and
   (e) management of non-compliant cruise ships.

E18 In the event of complaints from Sensitive Receivers in relation to a specific cruise ship, the source of the offensive noise must be identified and action taken to reduce noise levels with details submitted to the Secretary. The ship must not be permitted to berth at the SSI in the future, unless it can be demonstrated that measures have been taken to reduce noise levels.

AIR QUALITY

E19 The SSI is to be operated to:
   (a) minimise the risk to Sensitive Receivers from adverse health impacts from exposure to cruise ship emissions;
   (b) support management strategies to reduce exposure; and
   (c) national environmental protection standards (as revised from time to time) set out in the National Environment Protection (Ambient Air Quality) Measure.

E20 The Air Quality Management OEMP Sub-plan must include the following measures to reduce emissions from cruise ships:
(a) use of low sulphur fuels at berth. Sulphur content is not to exceed 0.1% m/m (mass/mass) unless alternative methods to meet sulphur emission restrictions are utilised such as exhaust gas cleaning systems or scrubbers which act to remove the SOx directly from the ship exhaust. The use of an alternative method needs to be at least as effective, in terms of emission reductions, as the fuel oil requirements outlined above. Where low sulphur fuel is the proposed mitigation measure, ship fuel bunker notes must be provided and included in Operation Compliance Reports;
(b) use of low sulphur fuels for the duration of transit (1 hour prior to arrival and following departure). Sulphur content is not to exceed 0.1% m/m (mass/mass) unless alternative methods to meet sulphur emission restrictions are utilised such as exhaust gas cleaning systems or scrubbers which act to remove the SOx directly from the ship exhaust. The use of an alternative method needs to be at least as effective, in terms of emission reductions, as the fuel oil requirements outlined above. Where low sulphur fuel is the proposed mitigation measure, ship fuel bunker notes must be provided and included in Operation Compliance Reports; and
(c) ship generators/engines/exhausts must be maintained, upgraded and operated efficiently to reduce air emissions while in the Port of Eden.

E21 Unless otherwise agreed with the Secretary, the Operation Monitoring Program required under Condition D7 must, as a minimum, include monitoring of NOx, SOx and PM$_{2.5}$ at the closest potentially impacted sensitive receiver (taking into account prevailing winds) at least two days prior to the arrival of the first three cruise ship of the season, while they are at berth and for at least two days following departure. Where there is less than two days between departure of a cruise ship and arrival of the next cruise ship, monitoring must continue until there is at least two days between ship departures and arrivals.

E22 In the event of dark smoke emissions, offensive odours and/complaints from residential receivers in relation to a specific cruise ship, additional details are to be provided to the Relevant Maritime Authority on the ship’s exhaust management. Upon the return of that vessel, monitoring as per Condition D7 and testing of ship stack emissions and fuel used in transit and at berth must be undertaken by a suitably qualified specialist with the results submitted to the Secretary. Should further community complaints be received, and monitoring indicates emission levels in excess of that typically recorded for other cruise ships as part of the Operation Monitoring Program required under Condition D7, in the future the ship must not be permitted to berth at the SSI, unless it can be demonstrated that measures have been taken to reduce emission levels.

LIGHTING

E23 All maritime lighting to be implemented as part of the SSI shall have regard to the location of nearby residential dwellings. Lighting impacts shall be minimised to the extent possible, and comply with AS 4282:1997 – Control of the Obtrusive Effects of Outdoor Lighting and relevant Australian Standards in the series AS/NZ 1158 – Lighting for Roads and Public Spaces.
