

Dear proponent for Western Sydney Airport Metro rail

Thank you for allowing me to provide feedback to your project.

When and how will the Western Airport metro line be extended to connect Parramatta to St Marys?

Will the train stabling yard be position on the eastern side of line near Airport Business Park so future metro line connecting Strathfield, Lidcombe, and Cabramatta to Airport Business Park can share such infrastructure?

Given that there will be a heavy rail line connecting Leppington, Western Sydney Aerotropolis and Macarthur , will Sydney Metro consider having 4 platforms at Western Sydney Aerotropolis station to reduce having two Western Sydney Aerotropolis stations with some distance apart?

Regardless whether the proposed heavy rail line connects or not between Kelvin Park and Macarthur via Western Sydney Aerotropolis, will heavy rail services between Western Sydney Aerotropolis and Leppington connect with Cabramatta and Bankstown?

When will there be stations and platforms at Oran Park and Macarthur that will connect to both heavy rail and metro rail lines via Western Sydney Aerotropolis?

How much reused, recycled, and recyclable products will be used in your project?

How will your project deal with natural disasters such as flooding and bushfires?

Will the station's built and natural canopies provide shade and protection from sun and rain?

Will your project provide way finding, tactile geographical indicator strips, ramps, audio described lifts with braille buttons, hearing loops, accessible toilets, and access parking?

As persons travelling to and from airport will have multiple luggage loads, will humans have control to delay closing of doors?

Will there be bicycle parking at stations?

For road crossings, will Sydney Metro provide road and pedestrian overbridges to cross over?

Again, thank you for allowing me to provide feedback to your project.
