

LEONIE HALLEY  
MT SNOWDEN  
RYE PARK 2586  
NSW

**RYE PARK WIND FARM - MODIFICATION 1**  
**Application Number: SSD-6693-Mod-1**

I am opposed to this application:

- I do not want the peaceful rural lifestyle I have here in Rye Park to be destroyed, which it will be by traffic, clearing activity, building of the wind turbine and the noise of them once they are up.
- I am opposed to the visual impact these will have as I will be able to see at most of the turbines from my backdoor.
- I am very worried about the mental health implications of this development upon me.
- The traffic will be coming past my house all day every day and the noise is amplified at my property. I will hear and see most of the turbines of this Rye park farm.
- I am opposed to the increased size of the turbines and the increase in their environmental footprint which is doubled.
  - The increased vegetation clearing and construction of internal roads from 12 metres to 30 metres
  - The clearing of existing trees and vegetation and its impact on birdlife, and animals and their food source.
  - The increased erosion and permanent damage all the internal roads will cause.
  - The damage to the roads and infrastructure all around Rye park as traffic, large and small come into our district.
- I am opposed to the destruction of the roads because of the continual heavy traffic and size of trucks that will have to be used to get the bigger blades and turbines here.
- I am opposed to the removal of roadside trees that will be cleared to get the increased sized turbine tips to Rye Park.

**I do not want any wind turbines in Rye Park at all.**
