

Objection: Trinity Grammar redevelopment (Project 25081)

Generally existing heavy traffic on all streets around Trinity Grammar across morning and afternoon school days, impacting local residents' accesses and drive times.

Harland St/Queen St
Existing traffic chaos and congestion every weekday morning as drivers commute from Trinity Grammar to the busy thoroughfare of Queen Street at a narrow and difficult intersection.

Service Avenue
Heavy, fast moving traffic per existing 'rat run' at school drop/pick up times – drivers wishing to avoid busy Queen St. intersection; chewing up the road surface and creating noise and potential road safety issues.

Victoria Street:
Mature/landmark trees of substantial visual beauty and environmental value as fauna habit

Victoria Street:
Traffic jams from Trinity Grammar drop off/pick up zone all the way into Harland St every school day morning, school day tail backs along Victoria Street impacting other road users
