

Modification Application

Quote from Rye Park Wind Farm Community Consultation Committee Meeting No 17 held at Yass Soldiers' Memorial Hall, Yass Thursday 7th February 2019

Tilt Representatives stated that:

- *Should Tilt not be successful in signing a PPA, we will consider exploring the idea of submitting a modification to the current Development Consent. It could involve increasing the tip height from 157 metres to 200 metres.*
- *A tip height modification would see the use of larger turbines, which would increase the turbine capacity from approximately 3.5MW to around 4.5MW. **Tilt would not seek other alterations to the Development Consent** and would work within the current noise restrictions*

In their application letter of 23 April 2020 they ask for far more:

- *Increase to the wind turbine envelope*
- *Revisions to the Development Corridor*
- *Selection of a Preferred Transport Route*

They have

- more than doubled the footprint from 256.8ha to 542.1ha.
- more than doubled the internal road width from 12m to 30m.
- more than doubled the internal impact area from 124.8m to 267.2ha
- the foundation of the turbines increases from 350m³ to 800m³
- run all the work traffic through the middle of Rye Park

How can they give a commitment to the Community and then be allowed to renege?
