## **Sydney Metro - Western Sydney Airport**

### **Application NoSSI-10051**

#### OBJECT TO THE PROPOSAL

##### Reasons:

- o Documents of the application did not make any assurances for residences during the construction. What do we do / who we contact to complain?
  - Greater level of noise.
  - Construction dust, dirt etc.
  - Damage from vibration to properties. (All properties in 1km from proposed line should have inspections before and after construction.)
  - General loss of amenity during construction.

If residents feel unfairly treated they will turn the media, particularly the current affairs shows.

- o Reference to is made to connecting the proposed line to Northern metro line "Track stubs for potential future connection to north". *Chapter 7 - Project description operation*

This was never expanded upon in the documents. If this happens the line will go under or through my home.

This is within the scope of the project as it not a stand alone. It is causing great concern as homes Compulsory Acquired are purchased for less than market value with limited or no negotiation. We currently have homes being built that may need to be demolished for the line.

We will not be able to sell as no one wants a house with this hanging over it.

#### DECLARATION

I declare that I have not made any reportable political donations in the previous two years.
