Dear Genevieve,

Enquiry Regarding Mangoola Coal Continued Operations Project (SSD 8642)

I acknowledge receipt and refer to your email enquiry on 15 July 2019 regarding the proposed Mangoola Coal Continued Operations Project.

Ausgrid has been asked to comment on the proposal, including advice on recommended conditions of consent. The proposal appears to impact on Ausgrid infrastructure that is near the proposed site based on review of Ausgrid GIS records.

Ausgrid will require site specific assessment during the design phase for any assets impacted by the development in maintaining reliable supply to nearby communities.

The requirement to remove or relocate Ausgrid assets will be assessed during the design phase of the project. It is understood that a 69 pole relocation project is currently underway (Ausgrid Ref XCW026142 / SC-14045).

The Ausgrid design certification process for customer initiated asset relocation will ensure that specific design and access requirements are met during the project delivery phase.

Should you require any further information please do hesitate to contact me.

Yours sincerely,

Simon Stewart
Program and Resource Manager – Major Project Services
