

I hereby declare that I object to the Bowman Creek Windfarm proposal ID No SSD 10315.

I oppose the Windfarm for the following reasons:

Most of the residents are going Solar to save on the cost of Power.

I have seen and heard the noise these windfarms make in South Aus, which proved they didn't generate enough power last season.

Our Vegetation and Land has just started to recover after years of drought. We don't need machinery and these giant windfarms coming in and destroying more land.

The recent approval of the Illawarra Hydrogen power station will provide the necessary replacement energy of the closure of Liddell power station. Concerned Louise Smart.
