

Eboney. Bendle

20 Inglewood road muscle creek

Muswellbrook 2333

To Whom It May concern,

I object to the Bowmans Creek Wind farms

My name is Eboney Bendle I have lived at Muscle Creek for nearly all my life in the 5th generation on this property and there is no way that I want the wind farms.

At the moment I'm doing my HSC and intend to do other studies from home. Therefore I don't think I'll get much done as noise will be a big factor to my studies.

My family love to sit outside and look at the beautiful views that Muscle Creek has to offer, this will not be possible if these wind farms go ahead all the mountain lines will never be the same.

What is going to happen to the wild life and plants once they are all gone, they will never return. The wind farms will have impact on our cattle and horse and they will not be able to cope with the noise as they are not used to the noise and you will not be able to go near them.

In turn what is going to happen when the wind farms turbines have had their day are, they are going to be left there just to rust away and fall down making for more unsightly views that I don't in the first place.

The impact on our health due to the droning noise it will have a negative impact on our emotional and physical health. My uncle has epilepsy and the constant noise could bring on a seizure which could be life threatening.

E. Bendle
