

Rozelle Interchange, Modification #2

Frankly I am not a fan of the project but recognise it is a fait accompli. However, write because I want to salvage a better result than is currently offered by Mod 2.

Surely there's a better way!

1. I live at the north end of Annandale and when driving, frequently need to turn right into the Crescent from Johnston street to head to Glebe and Forrest Lodge. Under the current plan this route is no longer available. Very inconvenient!
2. Being a resident of North Annandale I regularly cross the Crescent at the lights to Bi Centennial Park on foot. Apparently with Modification2 I will now have to cross four roads! (presumably all with traffic lights)
3. The Concrete Plaza from Rozelle Bay light rail station is a barren, ugly thing
4. The Car overpass is noisy and beyond ugly.
5. Concrete pedestrian footbridge connecting Rozelle bay foreshore is circuitous – very pedestrian un-friendly. Will be a source of frustration for years to come!
6. It seems much of this clumsy and ungainly mess is to accommodate the Car overpass in order to cut out a set of lights. Here's an idea: why not build another tunnel? What's another tunnel? (I'm sure there's a good reason not to, but it'd be nice to know)

Cant we please re-think this?

Surely there are more elegant solutions!!
