

# NO to Martins Creek Quarry Project

This project **MUST NOT** go ahead due to:

- Endangered species - Eastern Quolls seen in this area
- Size of village - too small to handle 280 trucks a day
- No one will be safe when trying to cross Paterson Road or King St in the shopping area with 40 trucks an hour going through our narrow streets
- Daracon has been in breach twice???? They will do it again.
- ALL truck use DIESEL - more health problems for us
- The mineral resource mined - ballast etc is carcinogenic - regardless of being covered, the fine dust will seep from the trucks into our lungs
- Diesel poisoning from the number of trucks going through town - more poison!!!
- Trucks go through major shopping area and do not adhere to the speed limit
- Trucks have already damaged cars through stone chips - no compensation from Daracon!!!
- Bus drop off point for kids in the shopping area - they don't look when they run across the road - they are kids!
- Some will be killed by this amount of traffic.
- So much noise from the trucks running 6am to 6pm 5 x days a week
- All parking is to be stripped away!!! Offering a tiny piece of sloping land in King Street for parking. Our town is very busy now without the trucks due to housing developments in Vacy and surrounding areas.
- All businesses in town will suffer if not close.
- The peace and tranquillity of the town will be ruined - the reason we all live here.
- Two historical buildings on the turning corner of the proposed haulage route (Post Office and CBC Bed and Breakfast) will be damaged due to mortar, hand-made bricks from convict labour.
- All workers will have to add a further hour a day on to their travel time due to trucks queueing down Flat Road / Melbourne St traffic intersection and other routes they take.
