NSW Planning Industry & Environment

Independent Planning Commission

Application SSD-6612 | Martins Creek Quarry Project

### **Support on the proposal of the Martins Creek Quarry Project**

We would like to confirm our support for the Martins Creek Quarry Project. We are involved in the construction industry, and we are aware of the importance of ensuring quality materials are available at a competitive price.

Martins Creek Quarry is one of a very select few quarries producing high quality hard rock products and will be relied upon to provide construction materials that meet State Government specifications for the construction of road and rail projects within the Greater Hunter Valley region.

Daracon is a well-known business in the Hunter region of NSW. We have been working with them for many years, successfully completing many projects. Our business is reliant on quarries such as Martins Creek Quarry to maintain our local branch.

We understand the Environmental Impact Statement has addressed issues raised by various government agencies and community.

We strongly support the Martin Creek Quarry Project as it will provide significant economic prosperity for the region.

Your Sincerely,

A handwritten signature in black ink, appearing to read 'Stephen Watterson'.
