To whom it may concern

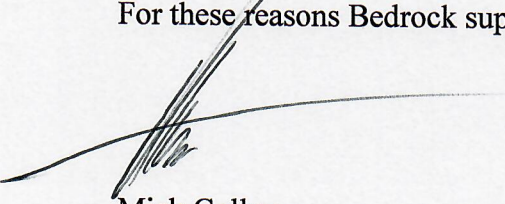

1 November 2021

Our company Bedrock Quarry Products has had an association with Gunlake Quarries since 2012. During that time we have established a strong relationship with them as a customer purchasing quarry materials and also transporting quarry materials to their affiliated concrete plants and manufacturing plants.

Factoring in environmental needs, Bedrock has purchased and designed trucks to transport larger volumes with less fuel consumption and less CO2 output per ton.

Our main concern is with the state of the current Sydney market and a shortage of quarry materials, we have concerns that Gunlake may not be able to keep up with the demand with their current consent.

For these reasons Bedrock supports the Gunlake Continuation Project SSD.

Mick Colley
