Preserving the Balance of Nature

To
Department of Planning

Lithgow, 6 March 2022

**Ref.: Wallerawang Battery Energy Storage System
SSD-14540514**

We would like to express our support for the Development Consent of the above project for the following reasons:

- The proposed battery storage of electricity forms a vital part of the development of renewable energy.
- It will provide some jobs in Lithgow's transition away from coal
- It will form an first step in the transformation of the former Wallerawang coal power station to the exiting 'Greenspot 2845 Activity Hub'.

We encourage the Department to approve application SSD-14540514

Yours sincerely

Thomas Ebersoll
LEG Secretay/Treasurer
