**Dendrobium Mine Extension Project SSI-33143123**

Dear Sir / Madam,

AGURBA Pty Ltd provides this submission as our support for Illawarra Metallurgical Coal's application for approval of Dendrobium Mine Extension Project SSI-33143123.

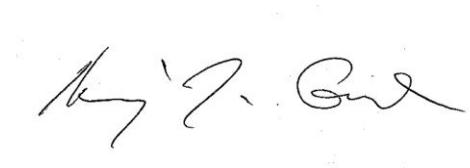

AGURBA is a small private company specialising in environmental mine subsidence monitoring. We provide services of monitoring the impacts of underground coal mining on the environment, from development approval through mining to post-mining stages.

We support the submission on the basis that although some impacts would result from the project, they would not be significant. The project will however provide great economic benefit to the region and extend employment opportunities to both Illawarra Coal and associated smaller businesses like ours.

Whilst liaising with management and staff of Illawarra Metallurgical Coal we have constantly witnessed their outstanding approach and commitment to all environmental aspects of mining and are convinced that the project is ready for the challenging times ahead.

Yours sincerely,

Andrzej Gurba  
Director
