RE: DENDROBIUM MINE EXTENSION PROJECT

Torque Enterprises Pty Ltd would like to take this opportunity to respond to the Dendrobium Mine Extension Project and outline the impact on our company resulting from the mine extension not proceeding.

We are the preferred OEM in line for production of our Torque Titan Underground Explosion Protected Diesel Engine LHD's which are industry leading in reduced Diesel Particulate Matter, supplying Dendrobium with environmentally friendly benefits in long term use underground.

As the OEM of these Underground LHDs, we employ around 80+ personnel in Queensland and New South Wales, producing locally manufactured machines with industry leading technology.

We have been working closely with Dendrobium with proposed supply of our Torque Titan range of LHD's which specialise in PANEL development in Underground Coal Mines.

We have allocated resources and finances around obtaining a purchase agreement with Dendrobium Mine to supply (x8) Torque Titans and would benefit greatly with the approval of the proposed Dendrobium Mine Extension Project.

I, Bevan Garioch am available to discuss any concerns or proposals to enable the endeavour of the Dendrobium Mine Extension Project and can be contacted directly anytime.

Kind Regards
