Re: Goulburn Poultry Processing Mixed Use Development (application number SSD-9143)

To Whom It May Concern,

I am writing on behalf of People for the Ethical Treatment of Animals (PETA) with regard to the proposed Goulburn Poultry Processing Mixed Use Development (application number SSD-9143).

Please see the attached submission outlining the concerns of PETA Australia and 8,188 supporting signatories in relation to the proposed facility.

Thank you in advance for reading the submission. We look forward to hearing from you regarding this issue.

Yours faithfully,

Laura Weyman-Jones
PETA Australia

PEOPLE FOR
THE ETHICAL
TREATMENT
OF ANIMALS**Re Planning application SSD-9143**

To the NSW Government Major Projects Department,

We're writing in relation to planning application SSD-9143, which seeks permission for the construction of a poultry abattoir with capabilities of trucking in and slaughtering 1 million birds every week.

We object to this proposal for the following reasons:

- As previously stated, up to 1 million birds could be trucked to and slaughtered at this facility every week. This would mean a lot of extra and ongoing traffic to the area, which would put pressure on existing infrastructure. The proposed development is anticipated to accommodate a total of up to 150 heavy-vehicle movements per day to and from the site, with an average of 10 truck movements per hour during the daytime period.
- Operations at the facility – as well as the chickens' waste and the bodies of dead chickens – would likely produce strong odours, which could disturb local residents and other businesses and have a negative impact on their quality of life. The nearest residential and commercial receivers are located approximately 60m and 75m, respectively, from the closest boundary to the site. Based on the "2 ou contour line" (1 ou is the detection threshold for odour) presented in Figure 9 of the Odour Report (Appendix C – Air and Odour Report – AAD_9143 – 52 Sinclair), it's estimated that a population of approximately 100 people (including the occupants of the proposed child care centre) may be affected.
- There are concerns that the development would use up to 40% of Goulburn's daily water consumption.
- The facility would likely diminish the character of the rural landscape and spoil natural vistas.
- Finally, the facility would cause immense suffering to the chickens who would be slaughtered there, at less than 2 months old. Chickens are intelligent, social animals who can feel pain and distress. In order to kill 1 million birds a week, the slaughter line will be relentless and, because of the fast pace of the work, not always accurate or humane for the birds who fight until the end to keep their lives.

We hope you'll take our objections, along with the comments made by local residents, into account when making a decision on this application.

Yours sincerely,

PETA Australia and signatories (full list below).

George Gavranic
Veronica Adolphe
Jacqueline Gardner
