

Olivia Ellen Denise Hanel of 100 Klinberg Road Jindera NSW 2642

Email livyhanel@bigpond.com

I Olivia Hanel do declare that I have not made any political donations in the past five years.

I would like to state my objection to the proposed Jindera Solar Farm SSD 9549

- 1 The company Greenswitch and the proponents have not considered how important this Prime Agricultural land is with the ability to graze it at full production, 45.7% is classed 3, high capability land. Ignoring this classification in EIS??
- 2 Location and the scattered areas of Solar Panels does impact on us and our rural lifestyle would resemble living in an industrial site.
- 3 Connections across Sparks Road (operational connections?) and Walla Road plus Ortlipp Road? Has Greater Hume Shire granted all accesses?
- 4 Solar Plants JSF and the Glenellen Solar Farm both too close together and to the Jindera Township, residents impacted greatly.
- 5 Divides the community with opposing neighbours and the conflict of the land use plus farmers who are accepting high leasing terms and having no empathy for the impact to residents, loss of rural lifestyle, devaluation etc.
- 6 Lack of Transparency-information has not been clear and at times misleading i.e. not informed of the solar panels to the north of our property, only on the Westside, were assured it was only a transmission line, (found out accidentally at the Culcairn Solar Farm community forum). Tree removal- 33 Paddock trees but does not include the true number of trees to be removed as this represents clusters, quite confusing. Dams some residents told there were only two dams to be removed when it is 9.
- 7 Hydrology can be downplayed very easily when surveys are done during drought times 2017-18-19? As we have the drainage line through our property in wet seasons water can be a problem for us. Soil contamination and excess flows? Negligible??
- 8 Land to be developed includes Crown Roads-being purchased by the proponents of the JSF-given only as letters and numbers and not named as a clear indication for the nearby resident to be clearly informed. (CADID 105306258 and CADID 105338106). Will this affect us as we reside in Klinberg Road?
- 9 Flora fauna wildlife habitat –about 17.41 hectares of native vegetation being removed including Blakely's Red Gums is substantial.
- 10 As a retiree we are stressed and extremely concerned about this Solar Farm being approved we care for farmers and other residents impacted by this proposal the physical, mental and financial well-being will be an enormous blow to us and our community.

Closing comment-Greater Hume Shire Council have made an important decision on behalf of the Shires residents, to formally submit an objection on this Jindera Solar Farm proposal, this report represents the feelings of so many residents.
