

Objection Sydney Fish Market Concept Stage 1 Demolition

- If the current site was to be retained there would be no disturbance to Pyrmont Bridge Rd
- The proposed demolition will increase volume of traffic caused by construction and demolition vehicles. Where will workers' vehicles park?
- hazardous materials will be disturbed during demolition and site preparation causing pollution of Sydney Harbour
- noise during demolition, construction and construction-related work will impact on the whole area
- waste & runoff control during demolition, construction and construction-related work will have negative impact on water quality
- there will be noise impacts arising from demolition of current site, thus affecting local residents and Sydney Secondary College
- demolition work must not occur at night
- care must be taken to preserve aquatic ecology and threatened species
- Wentworth Park must remain free from any disturbance
- no demolition work must commence until Hanson concrete batching plant (SSD8544) DA has been approved
