

I would like to lodge my support for the Glendell Continued Operations Project SSD-9349

The Glendell Continued Operations Project is situated in area where coal mining contributes directly to local and State communities & businesses. The brownfields project is an extension of existing operations in place over the past 10 years, considering this the project will have minimal impact on the environment within the Hunter Valley area

Glendell Continued Operations approval will continue employment for existing staff, contractors to a peak of approximately 690 and provide ongoing business to local suppliers, the construction of the new Mine Infrastructure Area will see approximately 350 construction jobs.

The expansion will see continued use of existing Mt Owen Complex Infrastructure to process and send the coal to the port. The export income generated by the project will assist in the state of NSW through royalty revenue and the national interest by contributing positively to employment and Australia's balance of trade.

The environmental assessment has more than adequately addressed the needs of the community, the Glendell Continued Operations Project deserves the support of the NSW government in order to continue providing a benefit to the state and continued support and employment to existing and future staff for years to come

Regards.

Callan Sheldon
