

To Whom It May Concern:

I wish to lodge a formal objection to the timeframe within which residents are able to review over 9000 pages detailing the proposed Western Harbour Tunnel and Warringah Freeway Upgrade, synthesise the information contained in the documentation, and make a considered, informed and educated objections or comments on this project.

I work full time running a business and have a child at school. It is literally humanly impossible for a person in a similar situation (full time gainful employment and caring for a young child) to review the submission in the time allocated.

I respectfully request an extension be granted to at least 1 June 2020, which will provide enough time to review and submit any objections and comments with regard to this project.
