

Nathan Wall

21 Delfin Drive, Wattle Grove, 2173

**SSD-5066-Mod-2 and SSD-7709-Mod1**

**I OBJECT to the above application for the following reasons:**

**I OBJECT to the application for Dangerous Goods Storage.**

The proposed modification area is surrounded by highly a populated residential, commercial, educational, cultural and recreational parkland areas, we purchased a property in Wattle Grove as it was a safe and secure residential area with little or no industrial risks. The proposed application would great increase the risk to residents and businesses in Wattle Grove, Moorebank and Casula area.

This creates a huge risk to the wellbeing and safety of residents within the above mentioned vicinities, was there to be a mishandling that could lead to an explosion, a fire with toxic smoke/fumes or a leak into to the local ecosystem.

My property and family will be directly impacted if any of the above was to occur. I will not have peace of mind and will live in fear of such events.

This will also significantly affect the value of our property.

**I OBJECT to the application for Height Increase:**

This will directly impact the quality of living and the value of property.

The view of the area will be significantly impacted by the structure proposed, significantly reducing the aesthetics and tranquillity of the area and property values.

**I OBJECT to the application for noise increase.**

The increase of noise levels will directly impact quality of life for many residents and myself. The lower vegetation on the Georges river does not provide a buffer zone as the sound travels up to where the majority of dwellings are.

Already we are impacted by the noise generated by nightworks at the site and an increase of noise levels will cause stress, sleep disturbance and possible psychological problems.

I declare that I have not made any reportable political donations in the previous 2 years.

Your name and signature and date.
